PROFILE

Experienced in UX/UI design with a solid foundation in computer science. Demonstrated ability to create intuitive interfaces through user-centric design principles and thorough research methodologies. Eager to leverage technical expertise and design skills to drive impactful user experiences within a collaborative team setting.

WORK EXPERIENCE

UX/UI Design Intern

Yallamvp

Dec 2023 - March 2024

- Gained practical understanding of UX/UI design principles and methodologies through hands-on experience.
- Participated in online training sessions to master design tools such as Figma, Adobe XD, and other relevant software.
- Contributed to ongoing design projects by assisting in the creation of wireframes, user flows, and mockups.
- Engaged in creative brainstorming sessions to generate innovative project ideas.
- Created and modified design elements using various design tools.
- Collaborated with cross-functional team members, including designers, developers, and project managers.
- Participated in regular team meetings and provided constructive feedback on design projects.
- Assisted in conducting user research to gather insights for enhancing user experience.
- Participated in user testing sessions and contributed to analyzing feedback for design refinements.

Internship Projects

Bidayya - Collaborated with 1 colleague

- The project is about building a platform for artists to compete, collaborate and showcase their work. My role is to craft intuitive and visually appealing user experience.

Rate your Professor - Solo project

- This app, on mobile and web, enables PhD students to rate their doctors, view doctor and university profiles, and access a leaderboard to celebrate top mentors. The goal is to empower students and promote excellence in academic mentorship

Zaiyana - Solo project

- An AI chatbot app that helps revolutionize shopping by providing personalized recommendations. My role is crafting an impressive landing page that captivates users and showcase the app's innovative features.

EDUCATION

Lebanese University - Faculty of Sciences

Nov 2020 - Sep 2023

Bachelor's degree, Computer Science
