PROFILE SUMMARY

A fifth-year software engineer at Antonine University, a Life scholar, and a Red Cross volunteer. Honed problem-solving skills with solving 100+ LeetCode problems. Recently, Earned Certificates in JavaScript, and Python, also successfully finalized a News Landing Page using Laravel and React.js. Aiming to apply my skills and contribute as an evolving engineer.

SKILLS

JavaScript, ReactJS, NodeJS, .Net, PHP, Java, Laravel, Python/Flask, Flutter, HTML, CSS, SQL, MSSQL, PLSQL, Kotlin, C#, C++, C, Critical Thinking, problem solver, Team player.

EDUCATION

Bachelor's Degree in Software Engineering

Sep, 2019 - Present

Antonine University, Zahle
GPA:82/100

EXPERIENCE

FullStack Developer Intern

Aug, 2022 – Oct, 2022

Daher Foods, Zahle

- Contributed to the front-end development, efficiently working on multiple pages of a Flutter-based web application.
- Collaborated on the back-end development using Python Flask, establishing seamless connectivity with Microsoft SQL Server to retrieve essential information.

Technician

Feb, 2021 – Sep, 2021

Digital Zone, Zahle

- Resolved software and hardware issues for desktop computers, ensuring smooth functionality.
- Provided client consultations for device issues, offering expert guidance on suitable solutions.

PROJECTS

Food Delivery System, Laravel Project

Created a Laravel-based food delivery platform where chefs and restaurants can add their menus and offers, and clients can order from restaurants, track orders, and leave feedback. Integrated Stripe API for secure payments and implemented a chef registration system for aspiring chefs.

News Landing Page, (React.js and Laravel) Project

Engineered a React-based news landing page, bolstered by Laravel for JWT authentication. Implemented real-time category analytics for user interaction insights. Proficient in contemporary web development and analytics-driven design.

React Wars, React.js Project

React Wars is a website that utilizes React.js for state management and fetches Star Wars information from an API. The data is presented in a user-friendly manner.

CarShare, Mobile App

CarShare is an innovative transportation mobile app created with Kotlin and integrated with Google Maps API. This user-friendly application offers a more economical and eco-friendly alternative to transportation.
