Internship

- xamarin.forms mobile development as a frontend developer in which we worked on a new simple application using xaml and c#

SOFT SKILLS

Teamwork

Work under pressure

Fast learner

Open-mindedness

Communication

Patience

feedback acceptance

HARD SKILLS

Programming languages(C,C++,java, python), Microsoft Office(Word-PowerPoint-Excel), internet and internet database, Kali Linux, Virtual Box, SQL

PROJECTS

Face Mask Detector using AI

we made a program using python that detects whether the person is wearing a face mask or not using machine learning and python libraries such as tensorflow , openCV , numpy and many others.

Blood bank management system

we made a python program that takes information from the donor and save it inside a database and then on urgent cases for blood, it will be easy to find the needed information.
