PROFILE

I'm a 4th year computer engineering student, looking for an internship in anything web development related or anything software development related to expand my knowledge and experience in this field.

EXPERIENCE

FULL STACK INTERN

Telepaty | Al Mina , Tripoli | 2023

I had the opportunity to work as an intern at Telepaty, a software development company that specializes in full stack development using React, Node.js, and MySQL.

- Designed a Full Stack Gym Management System Website.
- Includes a welcome page, register , login , user , memberships & supplements page.
- You can find the project in my github.

PROJECTS

BREAST CANCER PREDICTION USING NEURAL NETWORKS :

Intro to AI Course - BAU (Python)

This project aims to predict the likelihood of breast cancer using neural networks, a type of machine learning algorithm that can analyze large amounts of data and identify patterns. By training the neural network on a dataset of breast cancer cases, it can be used to classify new cases and provide early detection and diagnosis.

Project can be found on GitHub

GYM MANAGEMENT SYSTEM

INTERN (React.Js , Node.Js , MYSQL)

This project is a full webpage for a Gym. It's built using React.Js , Node.Js and used MySQL as my database. It's a single made full stack project, including a register , login , user , memberships and supplements buying pages.

This project is also designed to be responsive on many multiple devices

Project can be found on GitHub
