Planned and created multiple Windows and web applications using .NET Framework and ASP.NET.

Projects

Green Haven [[GitHub Link](#)]

A mobile app where users scan plants, get more details about them through AI, and add them to their own virtual garden. It contains a plants' market, a feed page and a live-chat section.

- **Front-end** // React Native, React, and Electron.js
- **Back-end** // Node.js, and Express
- **Database** // MongoDB

Social Media Website [[GitHub Link](#)]

A platform enabling users to share posts and engage with one another, allows them to connect with other users, follow their updates, like, comment, featuring a live chat function for real-time communication.

- **Front-end** // React
- **Back-end** // Node.js, Express, Socket.io
- **Database** // MongoDB

T-shirt Designer Website [[GitHub Link](#)]

A platform where individuals can create and preview T-shirt designs along with logos before finalizing them for printing. Uses AI to create logos.

- **Front-end** // React
- **Back-end** // Node.js, Express
