Junior Web Developer

I am a 19-year-old male Software Engineering student with a passion for web development and seeking an opportunity to gain practical experience in the field. I possess a strong foundation in HTML, CSS, JavaScript, Java 1, Database, SQL, PHP, and Discrete Math, and I am eager to apply my knowledge and skills in a professional setting.

During my time as a Mathematics teacher at Ibn Sina School in Beirut, Lebanon, I had the opportunity to teach grades 4–5–6–7 to students from diverse nationalities. This experience has enhanced my ability to adapt my teaching approach to suit individual student's needs and ensure effective knowledge transmission. I have successfully handled particular cases in my teaching career, demonstrating my versatility and dedication to helping students learn. Furthermore, my proficiency in three languages, namely French, Arabic, and English, enables me to effectively communicate with individuals from different linguistic backgrounds. This skill allows me to connect with diverse teams and clients, enhancing collaboration and understanding in multicultural environments.

As a motivated and adaptable individual, I am actively seeking a web development position to gain hands-on experience in the industry. I am eager to contribute my technical skills, teaching experience, and language abilities to create impactful and user-friendly web solutions. I am committed to continuous learning and growth, and I am confident that my dedication and passion will make a positive impact on any team or project I am a part of.
