Current Position

Senior Computer Science Student

Computer Science student at the Applied Mathematics department at the Faculty of Science - Lebanese University, mainly learning programming courses that range from basics, till Data Structures over the past two years. I'm a fast learner and disciplined student that is working hard to be a **Full - Stack Web Developer / Software Engineer** in the near future. Currently, I'm developing a fully fledged **eCommerce Platform** using the **MERN Stack**.

Education

Problem Solving

Professional Experience

Intern - MERN Stack Developer

CodSoft

10/2023 –
11/2023

Recently, I was selected as a Full - Stack Web Development Intern at CodSoft. During this internship program, I'll be working on two "level 3" web projects, eCommerce platform and blogging platform using the MERN Stack.

Projects

eCommerce Platform

2023 – present

MERN Project

I'm enriching my MERN skills I learned through building an eCommerce website. I'm also using Redux Toolkit to manage the state of the app. PayPal payment method will also be integrated in this project.

Languages

Arabic

Native Speaker.

English

Professional Working Proficiency.
