Android Application

JavaFX

Problem solving

Quick learning

## LANGUAGES

English  
*Professional Working Proficiency*

French  
*Full Professional Proficiency*

Arabic  
*Native or Bilingual Proficiency*

## EDUCATION

### Computer science at Lebanese University - Faculty of Science Lebanese University Hadath Faculty

08/2020 - 09/2023

## PERSONAL PROJECTS

### Android App with Java (Rental Cars App) (01/2023 - 02/2023)

- This application makes it easier for the user to search for a car for rent and provides him with booking cars with different specifications, capabilities and prices. There is also the ability for the Admin to add new cars and modify their specifications or delete. The project is based on Java language, XML interface, and SQLite database

### Desktop App with JavaFx : Registration service at the Lebanese University (12/2021 - 12/2021)

- The application is based on facilitating the academic and administrative work at the university (registration, input/output data, communication). The project is based on javaFx ,MySQL and the interface using scene builder.

### Website online clinic center(PHP ,HTML, CSS) (06/2022 - 07/2022)

- This project is the construction of a medical center that provides access to doctors' reservations and medical results for patients. This system will be built using the PHP HTML CSS working language. This project will involve multiple parts of the startup that need to be able to manage appointments and lab results.

## WORK EXPERIENCE

### Internship

#### Touch

09/2022 - 10/2022

Telecommunication service provider

Enterprise Applications Department

- I interned with a web developer and we used the following languages to create a website: JavaScript , Node JS , PHP , HTML , CSS .

### Internship

#### Online
