WORK EXPERIENCE

Web Developer

Autopia

08/2023 - Present

Beirut , lebanonn

Achievements/Tasks

- I engaged in frontend tasks using React. I crafted interactive interfaces, applying React.js modular approach. While primarily backend-focused, this broadened my skill set and collaboration abilities.
- I honed backend skills by using Node.js and Express.js to develop a robust server. Adding the needed middleware's for authentication and authorization . I managed data with MongoDB, creating efficient models and establishing intricate relationships. This hands-on experience enriched my web development expertise.
- I also gained valuable insights into effective teamwork and collaborative dynamics. Engaging with diverse professionals exposed me to the art of sharing ideas, fostering a creative environment, and collectively solving challenges. This experience refined my interpersonal skills and emphasized the importance of open communication within a collaborative setting.
