## PROFILE

Enthusiastic and detail-oriented Computer Science graduate with a Bachelor's degree and a comprehensive skill set in full-stack development. Adept at leveraging the latest technologies to design, implement, and optimize innovative software solutions. Eager to contribute my knowledge and passion for coding to a dynamic team in a junior developer role, where I can apply my skills in a collaborative and growth-oriented environment.

## PROFESSIONAL EXPERIENCE

### Web Developer

#### Inmobiles

(Held the position of Front End Developer, specializing in ReactJS and Next.js. Led and contributed to multiple web development projects, focusing on creating high-performance, scalable web applications optimized for speed and efficiency.)

### Web Developer

#### FireSpeed Solution (remotely)

(Held the position of Backend Developer, specializing in .NET. Led and contributed to multiple server-side development projects, focusing on creating robust, secure, and scalable web applications. Collaborated with front-end developers and designers to design and implement API services, ensuring efficient data exchange and integration)

### Freelance

(As a Freelance Developer, I conceptualized and built a comprehensive application utilizing Angular(version 15+) for the frontend, ensuring a dynamic and responsive user interface. The backend, powered by .NET, was designed to seamlessly handle requests to and from the frontend, interfacing with both SQL databases for structured data storage and MongoDB for accessing data hosted online. This end-to-end solution emphasized scalability, security, and performance, providing a robust platform that effectively met client specifications and user needs)
