Personal Information

DOB: 01/09/1998 | **Languages:** Arabic, English | **Nationality:** Lebanese | **Marital Status:** Engaged | **LinkedIn:** https://bit.ly/ragheeddamaj

Profile Summary

Enjoying programming for **5+ years**. Passionate **Full-Stack Web Developer (SQL, .NET, C#, php, React, Typescript/JavaScript, etc.)** for developing high-performing webapps/websites with intuitive user interfaces and exceptional experiences. Strong understanding of developing and integrating diverse data sources seamlessly of RESTful, GraphQL, etc. In addition to designing optimized databases and querying. Solid understanding of the principles and techniques of modern Web Apps (including SaaS multi-tenancy web-apps) and websites. Enthusiastic to learn new technologies.

Technical Skills

Frontend Web development:
HTML5, CSS3/SCSS, Bootstrap, TypeScript/JavaScript, React, Jest, React Router, Redux Toolkit, Node Js, Next Js, Material UI, Antd, Formik, React Hook Form, Apollo Client GraphQL, jQuery

Backend Web development:
.NET, C#, PHP, CodeIgniter MVC, PostgreSQL, MySQL, MongoDB, Azure Storage, Firebase, Selenium automation driver.

Other:
CI/CD, Azure Portal, Azure DevOps, GitHub, cPanel, FileZilla, postman, CMD, Adobe XD, Microsoft Office.

Other languages/technologies:
React Native, C, Java, Python

Operating Systems:
Windows, MAC OS, Linux (Ubuntu, Raspbian)

Experience

01/04/2021 – 02/01/2024
Sr. Software Engineer • Asteya Insurance • Florida, USA (Remote)
Promoted to Sr. Software Engineer on 1/04/2022

Technology stack:
Backend: .NET, C#, PostgreSQL, Azure Storage, Azure, DevExpress, SendGrid, EventGrid
Frontend: HTML5, CSS, SCSS, Bootstrap, React, Redux, TypeScript, Material UI, Antd, Formik, Apollo Client, Next, media query
Mobile: React Native, Typescript
Other: Azure, Azure DevOps, CI/CD, Git, Selenium Automation, Microsoft App Center, Google Play Console, Apple Connect and TestFlight, QuickBooks Accounting, TestingBot

Achievements:
- Continues development of a large SaaS multi-tenant Insurance Web App
- Developed enrollment tool allowing policy holders to register or to make individual endorsement

- Developed my first mobile app, "UFA Insurance" mobile application using React Native
- Developed the company's website with the CMS *https://asteya.world/*

Responsibilities:

- SaaS Platform continuous development of the backend and the frontend
- Develop and support React applications (including React/Typescript/Next application)
- Mobile-first responsive and cross browser testing
- Implement APIs, webhooks and cronjobs
- Integrate diverse data sources of RESTful and GraphQL Endpoints
- Triggering backend events and handling them within consumers
- Query and mutate data from/to PostgreSQL/Azure Storage database
- Database changes to cater new updates with ensuring backwards compatibility and migrate data in scripts as needed
- Rarely releasing new Infrastructure NuGets as needed
- Understand the business requirements from the product team, ensuring attention to detail
- Report any bugs and issues to the product team
- Manage Git branches and ensure proper branching strategy based on the requirements
- Validating team's code quality and readability through PRs
- Using Git, track and understand code history and changes
- Using CI/CD, move releases from one environment to another (Stable/UAT/Prod)
- Using webhooks and APIs, Integrated QuickBooks accounting system
- Generate documents using DevExpress (Word/PDF/Excel)
- In C#, develop and support excel test cases and selenium automation test scenarios
- Agile Team Scrum Master. As Team Scrum Master, track Azure DevOps items and ensure no blockings for the team members
- Led frontend team of 4 and
- Using Azure DevOps and MS Teams, collaborating with remote teams
- Using Azure Portal, create and monitor resources as needed.
