## PROJECTS

### Rags And Tags

This marketplace web application that collects groceries and lets people purchase their needs online. This project is developed using **HTML/CSS,JS,Bootstrap** and **ASP.NET MVC**

### Space Ship Game

i develop a small unity 3D project using **C#**, which it includes different levels and types of collisions

### Telegram Bot

Using **java**, **Stack data Structure** to implement telegram bot reply for a set of questions

### Football

Co-leader of a team of four who developed a website that develop crud application using **Next JS** and **My SQL**

### MindShift

I served as a co-leader within a two-person team that collaboratively developed a web application specializing in workplace gamification. Our project was designed to introduce gamified elements into non-gaming contexts, promoting engagement and productivity. We employed technologies such as **Laravel**, **React**, and **MySQL** to implement this solution.

### Hotel Management System

Using **C#**, **sql** and **MySQL** for the tables to implement hotel management system that tracks the booking and availability of rooms
