PROFESSIONAL SUMMARY

A dedicated Data Science graduate that is passionate about creating data driven insights to solve complex problems. I am eager to apply my skills in a collaborative environment with the solid foundation in programming languages, data analysis, and machine learning that I have. I am seeking opportunities to contribute to meaningful and impactful projects that will further develop my skills in data science.

EDUCATION

Bachelor's Degree in Data Science

Lebanese University
Nov 2021 – July 2024

TECHNICAL SKILLS

- Python
 - Pandas
 - sklearn
 - Database Development
 - Data Analysis
 - Computer Vision (CNN)
 - Java
 - MySQL
 - Tensorflow
 - Data Scraping
 - Machine Learning
-

WORK EXPERIENCE

Android App Developer (Intern)

Rafik Hariri University Hospital, Beirut
May 2024 – June 2024

PROJECTS

Weather Prediction

- Data preprocessing
- Data Analysis
- Developed a Linear Regression model to predict apparent temperature based on historical data.

UEFA Champions League (UCL) Winner Prediction

- Data preprocessing
- Data Analysis
- Built multiple classifier models to predict championship winners.

MNIST Handwritten Digit Recognition

- Implemented a Convolutional Neural Network (CNN) to identify patterns and predict digits in input images.

Tweet Sentiment Analysis

- Created a Long Short-Term Memory (LSTM) neural network model to predict tweet sentiment accurately.

Soft Skills

- Problem-Solving and Critical Thinking
- Effective Communication
- Teamwork
- Adaptability to New Tools and Technologies
- Time Management
- Attention to Detail

LANGUAGES

Arabic

English
