

# Abdallah Nassar

## PERSONAL PROFILE

As a student at AUL, I am pursuing my degree in Computerscience, with an interest in databases and data management. I have over two years of work experience in various roles, such as cashier, technical support specialist, and archiver. In these roles, I developed skills such as customer service, problem-solving, communication, and organization. I also demonstrated attention to detail, reliability, and efficiency. I enjoy working with diverse teams and customers, and I am always eager to learn new things and improve my performance. My goal is to apply my skills and knowledge to a career in the data or technology field, where I can contribute to meaningful projects and make a positive impact.

## WORK EXPERIENCE

**Blisshall | Feb 2023 - Oct 2023**

**Cashier/Assistant Manager/IT Manager**

- At AUB OSB Cafeteria, I worked my way up from cashier to assistant manager by demonstrating leadership and organization.
- Managed the installation and maintenance of Odoo, significantly improved business processes and increased efficiency.
- As an IT manager, I am responsible for monitoring the company's technological infrastructure and providing strategic IT solutions.
- Conducted thorough market research, examining consumer trends and competitors.
- Comprehensive reports and suggestions were generated to help with marketing initiatives and enhance business success.
- Provided IT support by addressing technical issues and ensuring that computer systems work smoothly.

## SKILLS SUMMARY

- Odoo Management
- Time Management
- Attention to Detail
- Data Structures
- Programming
- Software Development
- Skill Development
- SQL
- Object-Oriented Programming (OOP)
- JavaScript
- Cascading Style Sheet(CSS)
- PHP
- HTML
- Organization Skills
- Adaptability
- Market Research
- Information Technology
- Leadership and Management
- Programming Languages
- Microsoft Office
- Technical Support
- Oracle Database Administration
- Oracle SQL Developer

## EDUCATIONAL HISTORY

### AUL University (Arts, science, and technology univeristy in lebanon)| Aug 2021 - Present

My schooling has provided me with knowledge and skills in a wide range of computer science fields. I've taken courses in networking, logic design, machine architecture, programming languages including Java and C++, and database concepts. I can build and manage databases, write code, and implement algorithms. With a solid foundation in these areas, I am poised to excel in software development, network administration, and database management roles.

## PROEJCTS ACCOMPLISHED

### TIC-TAC-TOE Game Using C++| Sept 2021

- Implemented game logic to allow for player moves, victory conditions, and tie detection, which improved problem-solving abilities.
- Use object-oriented programming ideas to structure code into classes for better readability and maintainability.
- 
- Throughout the project, I demonstrated my knowledge of C++ syntax, data structures, and algorithms.
- Positive reviews from classmates and professors on the project's usefulness and clean design.
- This project piqued my interest in software creation and prompted further investigation of programming techniques.

### Crypto-Currency App (Software Development)| Oct 2022

- Independently designed and built a crypto wallet software with an emphasis on new features and user protection.
- In-depth market research was conducted to discover and evaluate existing crypto wallet solutions in terms of functionality, usability, and security.
- Implemented a vital feature of offline transaction capabilities, allowing users to safely execute transactions without an internet connection, hence improving user privacy and security.
- Designed and built the application's user interface (UI) and user experience (UX) to enable easy navigation and interaction for users.
- Presented the completed project to academic teachers and peers, emphasizing its distinct features, usefulness, and possible influence on the bitcoin industry.

- Data Entry
- JavaFX
- Customer Support
- Problem Solving
- Computer Knowledge
- Java
- C++
- Blender 3D Modeling
