SUMMARY

Experienced Full-Stack Web Developer skilled in both front-end and back-end technologies, with a strong foundation in the MERN stack (MongoDB, Express.js, React.js, Node.js). Currently managing IT operations, providing technical support, and teaching computer skills, proficient in Git and GitHub for version control and project management principles. I am eager to apply my technical skills and instructional background to drive innovative web development projects.

EXPERIENCE

IT Specialist & Computer Instructor | Mohammad Saad High School September 2024 – Present

- Managed and maintained servers, databases, hardware, laptops, and screens, ensuring smooth IT operations.
- Provided technical support for LCDs, laptops, and other IT equipment, troubleshooting and resolving issues.
- Taught computer skills to students, creating lesson plans and guiding them through practical exercises.

Full-stack Web Development Intern | Techlarious July 2024 – October 2024

- Developed and enhanced web applications using MERN stack (MongoDB, Express.js, React.js, Node.js).
- Contributed to a project that built a website offering career guidance for students through quizzes and personality assessments, and worked on an e-commerce site for laptops and other appliances.
- Implemented features to provide recommendations for scholarships, training, events, and mentorship.
- Used Git and GitHub for version control, collaborate with team members, and keep track of project updates.

Project Management (PMI) Intern | INJAZ Lebanon January 2023 – February 2023

- Attended and engaged in training sessions to learn project management principles and best practices.
- Assisted in planning and scheduling project timelines, ensuring tasks were completed on time.
- Supported project managers by tracking project progress and updating relevant documentation.
