PROFILE

Passionate Full Stack Engineer who believes in creating genuine value and memorable experiences. I love diving into open source projects and am always eager to learn and experiment to improve. I thrive on teamwork, turning ideas into real-life wonders.

EDUCATION

MU, Faculty of Sciences | January 2024
- B.S. in Computer Science

Udemy | November 2023
The Complete Web Development Bootcamp
Covers front-end (HTML5, CSS3, Bootstrap 5, JavaScript), backend (Node.js, Express.js, SQL), React.js, command line, version control, web design, and blockchain technology through real-world projects.

PROJECTS

- **Your Library** | Online Book Library Management
Developed an online library platform using **Node.js and Express**, integrated with **PostgreSQL** for managing book collections. Features include **REST APIs** for data interaction and user capabilities for organizing and rating books.
- **Travel Tracker** | Travel History Tracking
Built a user-friendly web app for travelers to track visited countries. Utilizes **Node.js** for server-side operations and **PostgreSQL** for data storage.
- **Foodie Delight** | Food Recipes
Developed using **Node.js** for cooking fans. Offers a wide range of tasty recipes, using **RESTful APIs** to show recipes based on user preferences.
- **BidCraft** | Online Auction
Built a dynamic auction website using **ASP.NET Core MVC**. Connected with a **MySQL** database to handle auctions and bids.

SKILLS

- **Programming (and Scripting) Languages** | JavaScript, Java, C/C++, C#, Python, SQL , php
- **Database Management Systems** | Postgres, MySQL
- **Frameworks, Tools** | Git, Linux, Node.js, Express, React, ASP.Net , Laravel
- **Languages** | Arabic // Native , English // Intermediate
