Bac 2 socio-economic

PROJECTS

Covid Center — Covid 19 tracker
Developed a comprehensive COVID-19 tracker, featuring live statistics, news updates, and an interactive quick test. Utilized HTML, CSS, JavaScript, and PHP to create an engaging user interface.

ShopZone — Ecommerce Website
Created an innovative e-commerce website with a focus on user experience and functionality. Implemented HTML, CSS, JavaScript, Vue.js and Laravel to deliver a seamless shopping experience.

CryptoVerse - Crypto App
Developed a dynamic and user-friendly crypto app, leveraging Vue.js and Tailwind CSS to deliver real-time market data, seamless trading experiences, and a modern interface supported by various APIs.

Mohammad Houry — Portfolio
Explore my expertly crafted portfolio website, spotlighting my front-end development skills with Vue.js and Tailwind CSS, and showcasing interactive elements that exemplify my attention to detail.

Weather Ease — Weather App
Designed and developed a dynamic weather website utilizing Vue.js and Tailwind CSS, providing users with real-time weather information, intuitive interfaces, and seamless user experience.
