Summary

I am two years experienced mechanical engineer with a proven work and training history in the mechanical engineering field who has a passion for programming. I took a serious decision in shifting my career path. I have been taking extensive courses to improve my programming skills, joined a programming bootcamp and did several web developments projects. Currently looking for a junior software developer job to kick-start my career in programming.

Education

SE Factory   **November 2023 – January 2024**

Full Stack-Web Development: Learn basics of software development (html, css, javascript), frontend (react js and react native), backend (php, laravel, nodejs), relational and non relational sql, design tools (figma), git and github, aws, individual and group projects.

SE Factory   **September - November 2021**

Foundation Of Computer Science Course: Studied the basic of programming using Python before diving into built-in data structures (lists, dictionaries…), algorithms (search, sort, recursion, bfs, dfs …), data structures (linked list, stacks, queues, graphs).

Beirut Arab University (BAU), Beirut, Lebanon   **2014 – 2020**

Bachelor's degree in mechanical engineering

Educational Project

E-Commerce Store

Developed in .NetCore 6, angular, Redis and Stripe.

• The user has a smooth and safe experience browsing and purchasing from this store, filter feature is available by price and category.

• Add items to card to review them before purchase – items are stored in server memory and saved per user\email.

• Online payment is executed using Stripe that follows the payment card industry data security standards (PCI DSS) which allows strong customer authentication and accept payments globally.

Peace Pulse [Github]

Developed in laravel, react native, web rtc.

• Connect you with a psychiatrist, consider your preferences and therapeutic needs, Engage in transformative video sessions.

• Receive daily resources tailored to your mental health journey (poadcast, videos).

• Benefit from a compassionate community of like-minded individual, Get help for your problems from our trained ai.
