Summary

I'm a passionate self-taught full-stack web developer with a strong inclination towards front-end development, especially with React. Upon researching various tech stacks, I discovered that the MERN stack presents numerous job opportunities, which led me to delve deeply into mastering it. Throughout my journey, I've acquired skills in both front-end and back-end development, working on diverse projects that have sharpened my abilities. Currently, I'm channeling my efforts into further refining my expertise in front-end development to create captivating and seamless user experiences.
