As a recent Computer Science graduate, I am equipped with a solid foundation in designing websites, networking, and managing databases. Throughout my academic journey, I have honed my technical skills and gained valuable experience in delivering successful solutions that align with client requirements. Despite being a fresh graduate, I am enthusiastic, adaptable, and eager to contribute my expertise to the industry. I possess excellent interpersonal skills, enabling effective communication and collaboration with diverse clients. Embracing challenges, I actively seek opportunities to further develop my abilities and stay updated with the latest advancements in my field. My unwavering passion lies in utilizing my technical knowledge to make a positive impact on individuals and organizations alike.

EDUCATION

High School Diploma - ES

Educational Arab Institute

2018 - 2019

BS in Computer Science

Lebanese International University

2019 - 2023

TRAINING

Problems Solving

HackerRank

Achievements/Tasks

- Data Structures
- Sorting/Searching Algorithms
- Graphs
- Trees
- Big O Notation

Self Education

Laravel

Achievements/Tasks

- Sending emails
- Seeder
- Migrations
- CRUD
- Authentication
- API

SKILLS

Laravel

Mysql

Bootstrap

Robotics

Algorithms

PERSONAL PROJECTS

SE-Factory Project

- Hangman Game - Python
- a game in which the object is for one player to guess the letters of an unknown word before the player who knows the word creates a stick figure of a hanged man by drawing one line for each incorrect guess

Senior Project

- Symptoms Diagnosis - Laravel
- The Symptom Diagnosis project is a user-friendly web application that allows users to select specific symptoms, and based on their choices, provides them with a comprehensive diagnosis result. Using advanced algorithms, the system analyzes the chosen symptoms to generate accurate and personalized health insights, enabling users to make informed decisions about their well-being
