Education

BS in Computer Engineering

Sep 2020 - Jun 2023

LIU, Beirut

University Life - Computer Engineering

My university experience was nothing short of amazing, marked by academic achievements, personal growth, and a deep immersion into the field of computer engineering. Throughout my journey, I maintained a commendable GPA of 3.3, a testament to my commitment to excellence.

As a Computer Engineering major, I delved into a diverse range of courses that honed my analytical and problem-solving skills. The dynamic curriculum exposed me to cutting-edge technologies, programming languages, and systems, providing a solid foundation for my future endeavors.

Beyond academics, I actively participated in various extracurricular activities, including coding competitions, hackathons, and tech meetups. These experiences not only expanded my knowledge but also fostered a collaborative and innovative mindset.

One of the highlights of my university life was working on my senior project, where I applied theoretical knowledge to real-world scenarios. This hands-on experience enhanced my practical skills and allowed me to contribute meaningfully to the field.

I am particularly proud of my involvement in Engineering projects where I collaborated with like-minded individuals, further enriching my university experience. These engagements not only sharpened my technical skills but also instilled in me the importance of teamwork and effective communication.

For more detailed information about my university journey or specific projects, please feel free to reach out. I am enthusiastic about discussing how my experiences align with opportunities in the LIU.
