BSc. COMPUTER SCIENCE GRADUATE | BEIRUT ARAB UIVERSITY

CRISIS MANAGEMENT » PROJECT MANAGEMENT » TEAM LEADERSHIP

Performance-driven and motivated computer science graduate, with solid professional experience in DevOps and proficiency in a wide range of programming languages. Possessing effortless communication skills in two languages, excellent teamwork abilities, and dedication to meet and exceed all goals. Detail oriented parallel to strong problem-solving skills with flexibility to adapt and learn in accommodation to tasks at hand.

PROFESSIONAL EXPERIENCE

IDS Internship - .NET Core (Activity Club Portal)   **November 2023 – Jan 2024**

Activity Club Portal is a user-friendly events and activities management website. Users can subscribe to events, display guidelines and timelines related to the events and activities available on the website. The website offers vast information related to personnel, pricing, and location of the events.

Admins have the ability to add, delete, modify content on the website using their own portal to help keep the website updated in accordance with the club agenda.

Internship Acquirements:

- Built frontend webpages and added interactions to webpages using JavaScript, AJAX and jQuery.
- Developed a full website using Visual Studio 2019/2022, ASP.NET/MVC, C#.NET and Entity Framework Core (6.0/7.0).
- Developed Web APIs (.NET Core 5.0/6.0/7.0) to be used along the website.

Next Solutions   **November 2022 – Feb 2024**

Senior DevOps Engineer

- Managed Ubuntu systems, writing bash scripts for various server functions.
- Installed and configured monitoring tools like Zabbix, Telegraf, and Grafana to monitor system performance.

- Inaugurated streaming tools such as Nimble and Ant Media Server.
- Leveraged Airtable database to manage and organize critical data efficiently.
- Created JavaScript scripts to enhance data processing and streamline database operations.
- Collaborated with external parties to provide technical support and ensure efficient system operations.
- Monitored system performance with readiness to resolve any error or issue at hand immediately.
- Conducted routine source inspections to confirm servers are in optimal condition.

PROJECTS

- BookMart (Website and Mobile Application). Developed using **Flutter** for the mobile application, **ASP.net** for the website and **MySQL** for the database. Implemented features for searching, buying, and rating books.
- Career Helper, utilized PHP, HTML, CSS, and SQL to create a dynamic and interactive job search platform. Integrated features for job listing, resume uploading, and profile creation.

SKILLS

Programming Languages:
- Java, C++, C#, Python
- JavaScript, jQuery, AJAX
- PHP
- SQL
- BASH
- Flutter (Dart)

Tools:
- Microsoft Office (Excel, Word, PowerPoint)
- Visual Studio
- Android Studio
- Microsoft SQL Server

EDUCATION

BACHELOR OF COMPUTER SCIENCE | Beirut Arab University

- Relevant Coursework: Operating Systems, Communication Skills, Computer Security, Image Processing, Fundamentals of Algorithms, Concepts of Programming Languages, Computer Networks, Software Engineering, Database Systems, Artificial Intelligence, Machine Learning, Data Structures and Web Programming.

LANGUAGE

Fluent in English and Arabic
