EXPERIENCE

Software Developer   2023 - Present

AllegianceTek | Centro Mall Offices, 1st Floor

1. Frontend Development (Angular):

- Spearheaded the development of dynamic and responsive user interfaces using Angular, a powerful JavaScript framework.
- Implemented and maintained complex frontend features, ensuring seamless user interactions and a positive user experience.
- Optimized application performance through code refactoring and efficient use of Angular best practices.
- Integrated third-party APIs and libraries to enhance application functionality and stay current with industry trends.

2. Backend Development (Flask):

- Utilized Flask as the backend framework to handle API requests, manage databases, and implement server-side logic.
- Engineered RESTful APIs, enabling smooth communication between the frontend and backend components.
- Developed and maintained authentication and authorization mechanisms, ensuring secure access to resources.
- Integrated and managed databases seamlessly within Flask applications, using SQLAlchemy or other ORM tools.
- Implement unit tests and conducted debugging to ensure the reliability and performance.

3. Tools and Technologies:

- Proficient in version control systems (Git) for collaborative development and codebase management.
- Implemented and maintained Docker containers for efficient deployment and scaling of applications.

- Somehow familiar with servers and cloud platforms such as AWS or Google Cloud for hosting and managing web applications.

4. Build Automation and Integration:

- Implemented end-to-end testing strategies to ensure the reliability and stability of the entire application.
- Establish and optimize CI/CD pipelines, reducing deployment cycles and enhancing workflow efficiency.
- Implemented automated error monitoring(loggers) and alerting to proactively identify and address issues in the deployment pipeline.
