## EDUCATION

### Bachelor's Degree in Computer Science Lebanese University

11/2020 - 07/2023

Nabatieh

## PERSONAL PROJECTS

**Contacts App for Android:** To enhance user interactions and phonebook management, I developed an Android app that seamlessly stores contacts and enables calls directly from within the app. I utilized Android Studio, SQLite and Java to create this practical and user-friendly application.

**Flag Game:** I created a game that tests players' knowledge of national flags in an effort to create an entertaining and educational experience. For this project, Android studio and Java are used to create an entertaining and interactive game that gives players points for accuracy.

**Airbnb Clone(React.js):** To explore web development and user interactions, I constructed a replica of Airbnb's core functionalities using React.js.

**Netflix Clone(React.js):** I also created a clone of Netflix app using React.js.

## SKILLS

**Programming Languages:** Proficient in Java, Python, PHP, JavaScript, C and C++.

**Frameworks:** Good knowledge in React.js. Knowledge in ASP.NET.

**Databases:** Proficient with MySQL and SQL.

**Tools:** Good knowledge in Android studio, Git and GitHub.

**Other:** Knowledge in Data visualization, ML supervised algorithms.

## CERTIFICATES

**Udemy Master Git and Github - Beginner to Expert**  
Achieved proficiency in version control with Git and collaboration tools like GitHub, ensuring seamless project management.

**Udemy Complete JavaScript , jQuery and React Bootcamp**  
Achieved proficiency in javaScript , jQuery and React.js.
