### PROFILE

experienced marketing and graphic design professional with a robust academic background in computer science. Skilled in web programming and design, proficient in a wide array of programming languages including HTML, C++, C, C#, SQL, PHP, React, Angular, Assembly, Java, JavaScript, and JavaFX . Proven track record of successfully executing projects in both marketing and technical domains, combining creativity with technical expertise to deliver compelling solutions. Thrives in collaborative environments, adept at translating client requirements into innovative designs and functional web applications. Passionate about leveraging technology to enhance user experiences and drive business objectives.

### Work Experience

Solo Production

worked as a Graphic Designer and Marketing Specialist at Solo Production, I played a pivotal role in shaping the visual identity and promotional strategies for numerous restaurants and shops. Leveraging my expertise in graphic design and marketing, I collaborated closely with clients to understand their brand vision and translate it into captivating visuals and impactful marketing campaigns. From designing engaging social media content to crafting eye-catching advertisements, I consistently exceeded client expectations and contributed to the growth of their online presence. My ability to blend creativity with strategic thinking allowed me to effectively communicate brand messages and drive engagement across various digital platforms, ultimately enhancing brand visibility and customer engagement for our clients.
