📍 Beirut, Lebanon

## EDUCATION

### Computer and Communication Engineering

Lebanese University - Faculty of Engineering

2019 - Present

Beirut

#### Course

- Cryptography and network security, Computer networks, operating system

### Computer Science student

Lebanese University - Faculty of Science

2021 - Present

Nabatiyeh

#### Courses

- web development, mobile development, database, GUI

## PERSONAL PROJECTS

### Spam Mail Prediction using Machine Learning with Python

- The Spam Mail Prediction project involves developing a machine learning model in Python to classify emails as spam or non-spam. It includes tasks such as dataset collection, preprocessing, feature extraction, and training a suitable algorithm for accurate classification.

### Inventory Management System

- The Inventory Management System, developed with C#.Net, SQL Server, and Visual Studio, offers a user-friendly interface for creating, updating, and managing users, products, categories, and customers. It facilitates order processing, automatically updating product quantities, and features a dashboard for quick insights into customer orders, total amounts spent, and the date of the last order.

### SSRF Finder

- Developed a robust Bash script to automate the identification of Server-Side Request Forgery (SSRF) vulnerabilities in web applications. The script, utilizing crafted payloads and response analysis, efficiently scans a list of URLs for potential SSRF threats, contributing to enhanced web application security.

## WORK EXPERIENCE

### Network Engineer Intern Engineering Gate Co.

08/2022 - 09/2021

A networking company that implements network infrastructure and Configure servers.

#### Achievements/Tasks

- Configuring Modems and switches - Network security - Servers configuration-problems troubleshoot

## SKILLS

linux

System Administration

HTML

CSS

Javascript

Php

SQL

C

C++

Python

Bash

Wireshark

Matlab

openssl (Encrypt/Decrypt)

c#

assembly(8085,8086,MIPS)

## CERTIFICATES

### CCNAV7: INTRODUCTION TO NETWORKS Cisco

Cisco's Intro to Networks imparts foundational networking skills, covering architecture, protocols, and troubleshooting for IT entry-level roles.

### CCNAV7: SWITCHING, ROUTING, AND WIRELESS ESSENTIALS Cisco

Cisco's Switching, Routing, and Wireless Essentials hones essential networking skills, crucial for IT professionals in a dynamic tech landscape.

### CCNAV7: ENTERPRISE NETWORKING, SECURITY AND AUTOMATION Cisco

imparts crucial skills for managing secure, automated networks in a rapidly evolving IT landscape.

### Network security Cisco

ensures expertise in safeguarding networks, employing robust strategies against cyber threats and vulnerabilities.

### TCM SECURITY - PRACTICAL ETHICAL HACKING TCM Security

provides hands-on training, equipping individuals with practical skills in ethical hacking and cybersecurity
