SUMMARY

As I progress through my final year of studies, I'm excited to merge my dual passions in cyber security and psychology. The intersection of these fields fuels my curiosity and commitment to understanding human behavior in the digital landscape. Throughout my academic journey, I've passionately delved into the dynamic correlations between technology and psychology. I'm dedicated to staying updated on the newest developments in both cyber security and psychology, aiming to continuously deepen my understanding and contribute meaningfully to these evolving fields.

EDUCATION

Holy Spirit University of Kaslik

PROFESSIONAL EXPERIENCE

Cyber Security Analyst Intern

Procomix Technology Group | July 2023-December 2023

- Enhanced understanding of cybersecurity, Security Operations Center (SOC), Advanced Persistent Threats (APTs), and other related concepts.
- Studied and acquired knowledge about MITRE ATT&CK and kill chain frameworks.
- Monitored and analyzed security alerts and events from various sources, including Microsoft products like Sentinel, MDE, MDO, and CASB.
- Prepared and distributed incident reports to clients using specific templates.
- Identified high impact incidents and escalated them to senior analysts.
- Assisted in conducting vulnerability assessments to identify potential weaknesses and security flaws in systems, applications, and network infrastructure.
- Documented and maintained accurate records of security incidents, including incident details, actions taken, and any relevant findings.
