## WORK EXPERIENCE

### RATEROO – FILM RATING WEBSITE (PERSONAL PROJECT)

| Jun 2023 – Oct 2023

- Rateroo is a web project conceptualized and developed to create a user-friendly platform for film enthusiasts. Showcases my expertise in Web Development, including Next.js, React, Tailwind CSS and Prisma for database management. Offer users the ability to rate and comment on films, fostering an engaging community of film lovers. Allowed me to enhance my skills in user-centric design, database construction and community-building. Demonstrates proficiency in designing captivating interfaces, managing complex databases and creating a seamless user experience.
