Beirut, Lebanon

PROJECTS:

- **Employee Management System**

Using Java , JavaFX , and MYSQL

EMS is personal project that allows the user to manage all employee information in a centralized database where you can add , view , update , edit and delete employees

- **Restaurant Management System**

Using PHP and PHPmyAdmin

Restaurant management system goes beyond conventional capabilities with its robust reporting tools. Administrators can access detailed analytics, including order trends, peak dining hours, and popular menu items. This data-driven insight empowers restaurant owners to make informed decisions, optimize operations, and enhance customer satisfaction.

- **Personal Portfolio**

Using HTML5 and CSS3

Personal portfolio viewing interests, achievements, and personal information
