

BAHAA YEHIA

FULL STACK DEVELOPER

 +961 70-788995

 yehyabahaa358@gmail.com

 Beirut, Lebanon

 Date of Birth: 8 - 11 - 1991

PROFILE

I am a highly motivated, responsible, and hardworking software engineer. Forward-looking to acquire professional experience in creating and executing innovative software solutions to enhance business productivity. Knowing various aspects of the software development life-cycle makes me stand out from other junior programmers. Strong creative and analytical skills. Capable of working well in a team environment and using my initiative.

EXPERIENCE

Cybersecurity Project Intern
BrainNest (German Company)
January 2023 – March 2023

- Created Ethical Hacking tools using Python
- Discovered and used different types of ethical hacking tools
- Learned more about Cryptography and Reverse Engineering
- Worked on Kali Linux Operating System

Full Stack Software Project
INGENIO (Spanish Company)
October 2022 - January 2023

- Created a Software for HR services for INGENIO company.
- Used Advanced Angular topics for Front-End
- Used Advanced Laravel topics for the Back-End with MySQL for database
- Discussed requirements with the company to make the software development proposals

WEB Development

FreeLancer

2022 - Present

- create eye-catching and user-friendly websites to generate web traffic and promote their clients' products and services
- discussing requirements with clients, making website development proposals, designing page layout

Infantry Officer

Lebanese Armed Forces

October 2011 - Present

- Working as a Company Commander for an Infantry Regiment
- Worked As a Platoon Leader for different Army Regiments
- Trained variety of soldiers computer science courses
- Trained with foreign army different types of military courses

Math and Physics Tutor

After School Institute

October 2009 – September 2011

- Tutored high school students with subjects related to math and physics
- Helped high school students understand topics they grab the knowledge they need to easily achieve great results.

EDUCATION

Bachelor of Computer Science (GPA:3.27)

Modern University for Business and Science

2020 - 2023

- Solid knowledge in object-oriented programming
- Quite understanding for data structure and algorithms
- Implementing various solutions for each problem

Complete Ethical Hacking Boot Camp: Zero To Mastery

Udemy – Andrei Neagoie

2023

- Scripted different python codes with advanced libraries to create new ethical hacking tools
- Gained deep experience in practical advanced ethical hacking tools for web applications, mobile applications, networking, and operating systems
- Worked on Kali Linux OS virtual machine

Complete Full Stack Development Boot Camp

App Brewery by Angela Lu

2023

- Designed dynamic and multi-browser compatible pages using MongoDB, Express.js, React.js, Node.js (MERN) technologies
 - Create authentication pages using OAuth, Hash functions with passport.js
 - Designing the application with popular CSS frameworks like Bootstrap 4, Tailwind
-

Certified In Cybersecurity Course

(ISC)^2

2023

- Learned advanced theoretical concepts related to security in web applications, mobile applications, networking, IOT, and operating systems
- Gained deep learning in concepts related to cryptography

Ethical Hacking Essentials

EC – Council

2023

- Learned ethical hacking essentials concepts
- Gained deep learning in theoretical ethical hacking tools and their usage

**University of Lleida (Spain)
Polytechnic School**

**Computer Engineering
Scholarship**

September 2022 – February 2023

- Developed a weather application using python
- Learned advanced concepts and libraries in python
- Gained deep learning in cryptography algorithms

Full Stack Training

Trainer Rony Rizk

2021-2022

- Comprehensive step-by-step tutorial on building web applications using Asp.net core, Microsoft SQL server, and Angular
- Design thinking and organizing the application to add, remove or update in an efficient

Diploma in Military Sciences

Lebanese Army Forces

October 2011 – August 2014

- Deep Learning in Military Studies
- Trained with US Army Forces and gained the IBOLC Certificate
- Practiced different Military missions
- Worked under huge pressure

EXPERTISE

● Languages

- JavaScript (ECMAScript)
- Python
- C Sharp (C#)
- PHP

● Frameworks

- React
- Node.js
- Laravel
- express.js
- tailwind

● Databases

- SQL
- MySQL
- MongoDB

● Tools

❖ Developing Tools

- Redux
- Postman
- Git/GitHub
- Webpack

❖ Ethical Hacking Tools

- Burp Suite
- Metasploit

❖ Other

- Kali Linux OS
- CCNA
- Docker
- PowerShell
- CLI

LANGUAGE

- English (C1 Level)
- Arabic (Native)
- French (A2 Level)
- Spanish (A1 Level)
