- Subnetting

EXPERIENCE

PHP WEB DEVELOPER INTERN
INTEGRATED DIGITAL SYSTEMS (IDS).
November 2023 – January 2024

Solid foundation in PHP programming, covering key concepts like variables, data types, loops, conditional statements, and functions. Build and manage databases using MySQL, perform CRUD operations, and create dynamic web pages and applications using PHP scripting. Skilled in PHP-OOP for creating classes, objects, and utilizing inheritance, encapsulation, and polymorphism. Furthermore, integrate front-end technologies like HTML, CSS, and JavaScript to develop dynamic and interactive PHP web pages.

CYBER SECURITY BOOTCAMP
SEMICOLON ACADEMY.
February 2024 – March 2024

Acquired a versatile skill set across different areas. In Social Engineering, I've mastered defense against manipulative tactics. My expertise in Cryptography includes encryption and hashing, exploring vulnerabilities. Web Fundamentals cover frontend, backend, and databases. Recon skills involve subdomain enumeration. Proficient in Burp Suite Proxy, I intercept web traffic and use advanced techniques. Lastly, I've demonstrated comprehensive understanding of various vulnerabilities, solving labs, analyzing bug bounties, and implementing effective mitigation.
