Phone:+961 70842539

Education

Master degree in Management Information System from Lebanese University.

Bachelor's Degree in Computer science from Lebanese University.

Skills

Languages: English (Fluent in speaking, Writing, reading, and Listening)- Arabic (Mother's tongue).

Operating Systems: Windows,macOS.

Applications: **Visual Studio Code, Visual Basic, Eclipse, SQL server, IntelliJ, Atom, Brackets.**

Computing Skills:

- JavaScript | React | Redux | React-Native
- Angular | Typescript
- NodeJs | ExpressJs
- HTML5 | CSS3 | SASS | Bootstrap | jQuery
- Java | Data structure | Design patterns | OOP | Spring Boot
- C | C++ | Python | C# | .Net
- PHP | WordPress
- SQL | MongoDB
- PHP Symfony | Laravel
- Git | GitHub

Experience

- ❖ June 2023-present
  - o Full Stack web developer –mdgroup (Remote)
  - o Responsibilities(front-end:react typescript,Backend: PHP framework symfony):
    - Worked on implementing new user stories using Material UI,while also building widgets,graphs,and dashboard,tables.
    - Worked with API for data retrieval and manipulation.
    - RTK Query integration implementing Redux Toolkit Query for managing API data fetching and caching efficiently.
    - Participated in Agile ceremonies such as daily stand-ups, sprint planning, and retrospective meetings.
    - Worked on fixing major bugs.
    - Ensured code quality and reliability through comprehensive test suites
    - Implemented robust testing strategies,leveraging jest for unit and integration testing.
    - Implementing a user-friendly interface to navigate through large datasets without overwhelming the UI
    - Handling data retrieval and serving specific chunks of data to the frontend based on pagination parameters, ensuring optimal performance.

- ❖ January 2023-May 2023
  - ○ Web Developer – Profit ISLE (on-Site)
  - ○ Responsibilities :
    - ● Worked on optimizing APIs that were taking long time to execute.
    - ● Worked on implementing new user stories using react javascript for the FrontEnd and java servlet for the Back-End.
    - ● Coordinated with the QA team to test and verify functionality,ensuring high-quality deliverable.
    - ● Participated in Agile ceremonies such as daily stand-ups, sprint planning, and retrospective meetings.
    - ● Worked on fixing major bugs.
- ❖ January 2020-2022
  - ○ Junior Web Developer –StackGenius Tech   (Hybrid)
    - ● Developed robust web applications using ASP.NET core,leveraging C# and Entity Framework to deliver scalable solution for client.
    - ● Worked on multiple project using React and Angular for the front end and for the backend spring boot,nodejs.
    - ● Proficient in building responsive e-commerce websites.
    - ● Skilled in utilizing React and Angular frameworks to develop interactive and user-friendly interfaces.
    - ● Extensive experience in crafting ecommerce platforms, emphasizing usability and functionality for seamless customer experiences.
    - ● Ensured ongoing maintenance and updates, maintaining high standards and improving the website's performance over time.
    - ● My expertise includes developing server-side applications, RESTful APIs, real-time applications, and integrating with various databases and third-party services.
    - ● Worked on building E-commerce websites using PHP.
    - ● implemented robust SQL queries and database design principles to ensure efficient data storage, retrieval, and manipulation for e-commerce functionalities.
    - ● Implemented secure practices in SQL to safeguard sensitive customer and transactional data, adhering to industry standards and best practices.
    - ● Employed design patterns like MVC
    - ● Conducted in code reviews

Freelance Projects:

E-commerce Website For Selling Scurf(BackEnd:PHP,DataBase:SQL,FrontEnd:React)

- ➔ User can login/signup/add to cart/proceed to checkout/rate product /add to wishlist/ track the order
- ➔ Admin can view /add /delete/edit products and categories/track order /send messages to the user,
- ➔ admin dashboard and histogram to track the number of orders/products.

PreownedPalace application(using React-Native)
- ➔ Is a marketplace for selling stuff,you do not need anymore.

- ➔ User can login / register to see all the items, also user can tap an item to see all of its details like who is the seller and where the item is located, and send a message to the seller and which will send a push notification to the target mobile.
- ➔ We can filter the list,add a new listing,add an image up to three images,add a title to the item, price and assign it to a category, and finally post it.
- ➔ There is an account page where user can access their listing,messages.

Book Store (Back-End:NODEJS,DataBase:SQL,Front-End:HTML,CSS**)**

- ➔ User add product / signup /login/ view product detail/add to cart/ proceed to checkout/ payment using stripe /track order.
- ➔ Admin can add / edit / delete / view products and process orders.
- ➔ There is data Validation.

E-commerce Website for selling clothes(Front-End:Angular, Back-End:SpringBoot**)**

- ➔ Users can add to cart / login / view order / proceed to checkout.
- ➔ Admin can add / delete / view / edit product/process orders.
- ➔ There is pagination/Sorting
- ➔ There is data validation,authorization.

Personal Attribute

- ➔ Motivated, driven, and focused on achieving wide IT knowledge ranging from software and web development.
- ➔ Excellent communication & presentation skills.
