in @Christelle Hourany

A software developer with an experience of 3 years in backend development for a payment mobile application.

I am looking for building a career in my profession, passionate and willing to learn more, develop and improve in it.

Education

● Bachelor's Degree in Management Information System

From September 2017 to July 2020 [Lebanese University](#) Achrafieh

Work experience

● Administrative Manager

Since September 2023 [Lynx Group SAL offshore](#) Horsh Tabet

- Manage client communications, order placement, and end-to-end coordination with manufacturers and shipping partners to ensure order fulfillment.
- Manage daily work operations and the company's monthly accounting operations
- Manage the data entry system for all our products, stock and data.

● Middle Software developer

From September 2022 to August 2023 [Suyool](#) Furn El Chebback

- Applied OOP fundamentals and design patterns to enhance code structure for better performance.
- Initiated a .NET Core project, applying DAO pattern, dependency injection, and interface concepts.
- Conducted thorough code reviews and comprehensive testing scenarios prior to deployment with GIT version control.
- Optimized database procedures to enhance query performance, reducing connection timeouts and deadlocks while ensuring faster results.

● Junior Software Developer

From September 2020 to September 2022 [Skash](#) Furn El Chebback

- Developed backend features for APIs, windows forms and services, using [VB.NET](#) and C# within the .NET Framework, enhancing the application's accounting system.
- Generated customized reports using MS SQL database to meet marketing and business needs, facilitating informed decision-making.
- Executed database operations and SQL queries to extract, manipulate, and manage data.
- Oversaw support operations, addressing claims from the operations team. Tracked and analyzed issues, ensuring prompt bug resolution for optimal application functionality.
- Created comprehensive project documentation, including UML diagrams and activity diagrams using Visio.

Skills

Team work

Collaborating effectively with others to achieve common goals

Good communication

Adjusting communication style based on the audience or situation

Computer skills

Design Patterns

DAO pattern, Repo pattern

OOP

Development Methodologies

Scrum, Agile, Waterfall

Development Platforms

.Net Framework, .NetCore 5, .Net 6

Documentation and Flows

MS office tools including Visio for UML diagrams and activity diagrams

Work Management and tasks

Azure portal, MS whiteboard, Asana

Version Control

GIT

Programming Languages

C#, [VB.NET](#), java

Development tools

Visual Studio, Postman

Management Database

MS SQL
