Solving

PROFILE

Highly motivated and results-oriented Communication Engineering student with a strong foundation in Java programming, database systems, and software development principles. Eager to leverage my abilities in a software developer role and contribute to the creation of innovative and user-friendly software solutions.

PROJECTS

Online Shopping Desktop Application

- Developed a functional online shopping desktop application in Java using NetBeans IDE.
- Implemented core e-commerce features such as product listings, a shopping cart system, and a basic checkout process.

Movie Recommendation Desktop Application

- Built a Java-based movie recommendation desktop application (NetBeans) offering personalized suggestions.
- Designed a collaborative filtering system that analyzes the viewing patterns of similar users to predict movie preferences.
- Integrated a movie dataset with user ratings to train the recommendation algorithm.
- Created a visually appealing interface using Java Swing (or other GUI technology).

Airline Management System

- Developed an Airline Management System using Java (NetBeans) to streamline flight and passenger information management.
- Implemented features for flight scheduling, seat booking, and passenger registration.
- Integrated MySQL database (managed through XAMPP) to store flight schedules, passenger data, and booking records.

EDUCATION

Bachelor's in Communication engineering, Lebanese International University,
Nabatieh
September 2022

COURSES
