2022	
<ul style="list-style-type: none"><li>• Developed course materials (C++, python, html, CSS, JavaScript, Java).</li><li>• Delivered engaging lectures.</li></ul>	

## Education

---

<i>BSc Computer Science</i>	SEP.2021 – JUN. 2024
<b>Rafik Hariri University</b>	Mechref, Lebanon

## Personal Projects

---

- **Akel.tech:** Designed and developed a user-friendly website for Akel.tech, specializing in food vending machines. The site features intuitive navigation and engaging visuals to showcase their innovative products and services.

- **Qatch Sushi Menu:** Crafted an appealing digital menu for Qatchlb, enhancing the dining experience for customers.
- **Al Shami:** Created an enticing online presence for Al Shami, a cookies patisserie renowned for its delectable treats. The website showcases the artisanal craftsmanship behind their products, enticing visitors with mouthwatering visuals and convenient ordering options.
- **Gema:** Developed a user-friendly mobile app for Gema, streamlining the process of medication management for users. The app provides features such as dosage reminders, medication tracking, and prescription refill requests, ensuring optimal adherence to treatment plans.
- **Ijazi:** Constructed a comprehensive business portfolio for Ijazi, highlighting their expertise and accomplishments in their respective industry. The portfolio showcases their past projects, testimonials, and key achievements.
- **The Fifty Five:** Designed a sleek and professional portfolio for The Fifty Five, showcasing their diverse range of services and past successes. The portfolio effectively communicates the company's unique value proposition and establishes credibility with potential clients and partners.
- **Lze2a:** Revamped and executed the redesign of the Lze2a website, employing Figma for meticulous design and React for seamless implementation.
- **RHU Student Information System:** Executed a comprehensive overhaul of the RHU SIS website, spearheading both the redesign and implementation phases to enhance user experience and functionality.
- **Snake Game:** Developed a desktop version of the classic Snake Game, featuring intuitive controls, customizable settings, and immersive graphics and sound effects.
- **3D Face Reconstruction:** Developed a 3D face reconstruction project, employing advanced computer vision techniques to transform 2D facial images into detailed three-dimensional models. Applied cutting-edge algorithms to extract depth information and achieve accurate reconstructions, showcasing expertise in computer vision and 3D imaging.
