As a senior-year computer science student at Antonine University, I possess a robust skill set encompassing Java, JavaFX, C++, C#, ReactJS, React Native, JavaFX, ASP.NET, .net core, and PHP frameworks like Symfony and Laravel. With a solid foundation in object-oriented programming and extensive experience in database management using MySQL and Oracle SQL, I am adept at developing scalable and efficient solutions.

SKILLS

- Object Oriented Programming | Java, JavaFX, C++, C#.
- Front End | HTML, CSS, Javascript, JQuery, reactJs.
- Back End | php, Laravel, Symfony, Asp.net, .Net core .
- Mobile Development | react native.
- Database | MySQL, Pl/SQL, SQL PLUS.
- Version Control | Git, GitHub.

PROFESSIONAL EXPERIENCE

ObSoft, Mansouriyeh, Lebanon   **March 2024 – Present**
Software Developer Intern.
  ➢ Skills: Symfony, Html, Css, JavaScript, mySQL, API Platform, Rest APIs, React Admin.

PROJECTS

- **Developed an advanced e-commerce platform using Laravel framework:**
  - Implemented robust user authentication, social media login, and profile management.
  - Designed store management, order management, and product management systems.
  - Integrated location services, live chat, and event management functionalities.
  - Incorporated currency conversion with multi-currency payments and cryptocurrency support.
  - Added features like chatbot integration, store follow options, and email notifications.
  - Admin features included store management, password reset, and access to seller reports.
  - Provided comprehensive seller reports and buyer reviews and rankings.
- **Developed a full-scale web application using .NET Core, focusing on article management and user interaction:**
  - Implemented CRUD operations for articles, enabling users to create, read, update, and delete their content.
  - Designed robust user authentication and authorization mechanisms, distinguishing between user and admin roles.
  - Facilitated profile management functionalities for users to manage their information effectively.
  - Enhanced user engagement with features allowing liking, commenting, adding to Favorites and sharing of articles.
- **Developed Pharmacy Management Information System (MIS) using javaFX(GUI):**
  - Created user interfaces tailored to specific roles..
  - Integrated a database to manage stock, employees, and products.
  - Utilized Java language (OOP) for MIS and JavaFX library for GUI.

EDUCATION

Antonine University**,** Baabda,Lebanon   **Expected Graduation: January 2025**
Bachelor of Technology in Computer Science – GPA:3.3/4.0
