## Accomplishments

I have worked on different projects for both front end and backend development.

- A wellness exercise app that allows users to choose an exercise according to their interest of the muscle they want to focus on. The project applied HTML, CSS, and JS.
- Worked with a team of 5 people to build a tour app using React JS. A react App working on a single page and with more than three react routers
- Used FastAPI, Postgresql, SQLAlchemy ORM and Alembic to build a Movies Database app and used ReactJS to build its frontend.
