Hobbies

Calisthenics

Mountain Climbing

PowerLifting

Camping & Hiking

About Me

I am a second-year computer science student with a fervent passion for web development. My journey into coding is fueled by a desire to create seamless digital experiences and harness technology to solve real-world problems. Alongside my academic pursuits, I am deeply immersed in the world of fitness as a mountain climber, calisthenics coach, and powerlifter. This diverse background has instilled in me a unique blend of discipline, creativity, and problem-solving skills, which I am eager to apply to web development projects and internships, striving to make meaningful contributions in the digital landscape.
