## PROFILE

---

I am an aspiring web developer with a strong commitment to acquiring new knowledge and skills. I am actively seeking a Full-Stack Web Development role where I can bring my passion and skills to make a positive impact.

## EXPERIENCE

---

### **Full Stack Development Program, Codi Tech (August 2023 – February 2024)**

*Codi Tech is a six-months intensive Web Development Bootcamp using MERN and SERN Stacks.*

Designed and developed several projects using Agile methodology for various clients including:

#### **E-Commerce Website | MERN Stack**

- Designed and implemented a fully functional e-commerce website aligning with the client's requirements, while using React for the front end, Node.js and Express for the back end, and MongoDB for database storage.
- Implemented user authentication for the Admin Dashboard where the admin can create/edit/delete a category or a product.
- Developed a product catalog where the end user can view all products, a specific product with its specifications, and filtering functionality by category.
- Collaborated effectively and communicated efficiently with team members to submit the website on the deadline.

#### **Michel Bandali Design Website | MERN Stack**

- Designed and developed a fully functional and responsive ecommerce website utilizing the MERN stack.
- Implemented OTP for email verification and user authentication to ensure secure user authentication.
- Allowed only verified users to access specific pages in the platform, while administrators could access the admin dashboard for product management.
- Developed a product catalog with options for both sale and collaboration displays, facilitating user interaction and showcasing client partnerships through the product catalog.
- Collaborated with a team of two members to ensure timely project delivery.

### **Fashion Zone Website | *MERN Stack***

- Led the design and development of a fully functional and responsive clothing shop ecommerce platform using the MERN stack.
- Implemented OTP email verification for enhanced security, restricting platform access to verified users.
- Designed and implemented user authentication systems, customizing access permissions for logged-in users and administrators to manage website functionalities.
- Developed a category page with navigation, enabling users to explore related subcategories and products.
- Implemented the add-to-cart functionality, enhancing the user shopping experience.
- Worked independently to develop and deploy the project.

## **EDUCATION**

---

### **Lebanese University | 2019-2021**

Master's Degree in **International Organizations**

*Completed all coursework for the master's program without submitting the final report.*

### **Lebanese University | 2015-2019**

Bachelor Degree in **Law**
