I'm a full-stack developer with hands-on experience in the Laravel framework and strong frontend skills in HTML, CSS, Bootstrap, Tailwind, and JavaScript. Currently, I am enhancing my skills in React and Inertia.js to further improve my development capabilities with Laravel.

My Projects:

1-MediaApp

- I offer services in developing dynamic social networking platforms with features like user authentication, image sharing, real-time engagement (likes, comments), link sharing, and favorites management. I specialize in creating interactive web applications using HTML, CSS, jQuery, Ajax, Bootstrap, and PHP to enhance user experience and system efficiency. >https://github.com/rafeaaSaayfan/MediaApp

2-DocBooker

- Developed a clinic website with an appointment booking system and real-time patient-healthcare professional connectivity. Used Laravel, HTML, CSS, Tailwind CSS, jQuery, AJAX, and MySQL to create a user-friendly platform featuring detailed doctor information, real-time scheduling, and instant confirmation, improving healthcare accessibility and interaction. >https://github.com/rafeaaSaayfan/DocBooker

3-FoodFinder (Uni Final Project)

- I can build a streamlined platform for finding and ordering food from local restaurants, featuring a responsive, user-friendly interface. My services include developing a system with tailored functionalities for multiple user roles (Admin, Restaurant Owner, and Customer) using HTML, CSS, Tailwind, JavaScript, jQuery, Ajax, and Laravel to enhance user experience and simplify the food ordering process. >https://github.com/rafeaaSaayfan/FoodFinder

  I also have a video showcasing everything on the website, which works seamlessly on mobile devices using WebView. >Video

Experience:

Freelancer (from 1.5 years ago):

- Worked on a variety of projects utilizing Laravel, Tailwind, JavaScript, jQuery, and AJAX to build dynamic and responsive web applications. Additionally, developed projects combining Laravel with React, Inertia.js, and Tailwind to create modern, high-performance user interfaces and seamless user experiences.

Three months of training with a team at my university led me to develop the CodeVerse project

- I can deliver a robust code snippet platform with comprehensive features including user registration, snippet submission, and admin approval. My services encompass creating categorized code libraries, integrating an iframe for responsive design previews, implementing advanced search functionality, and developing a user-friendly admin dashboard. I also offer expertise in using Laravel, HTML, CSS, jQuery, Tailwind, Prism.js, Vanilla.js, and AJAX to build interactive and efficient web applications tailored to your needs. >https://github.com/rafeaaSaayfan/CodeVerse

EDUCATION:

Bachelor In Computer Science
Islamic university of Lebanon (IUL), Wardeniye

My Skils:

- **Web Technologies:** HTML, CSS, Bootstrap, Tailwind CSS, JavaScript, Jquery, Ajax, React, Inertia

- **Backend Technologies:** PHP, Laravel

- **Databases:** MySQL, SQL, PhpMyAdmin

- **Other Skills:** Problem-Solving, Git, Github, GitLab, Linux, Postman, C++, Python, Java

  Attention: I have a solid understanding of C++, Python, and Java, with theoretical knowledge but no professional project experience in these languages.
