Education

Antonine University
2017-2022
BE in Software Engineering

Key Skills

Teamwork
Fast Learning
Communication
Problem-solving

About Me

I am a seasoned software engineer, recognized as a key team member. With expertise in diverse areas like web and mobile development, I excel in translating business requirements into efficient technical solutions. My strength lies in writing clean, maintainable code, and I am adept at swiftly learning new technologies. I bring excellent communication and problem-solving skills to the table, contributing to the success of collaborative projects.

Experience

July 2023 – July 2024
Developer at Globemed

- Develop and support microservice modules using Java Spring Boot based on business needs.
- Apply necessary UI changes using HTML, CSS and Javascript.
- Write or fix existing SQL queries according to business requirements.
- Use Git as a version control system to work with other developers.
- Develop necessary Restful APIs to use in another module when needed.
- Work closely with cross-functional teams to gather business requirements and meet business needs.
- Ensure the performance, quality, and responsiveness of modules by optimizing components and implementing best practices.
- Participate in testing process through unit testing and bug fixes.

January 2022 – June 2023
Developer at Microbits

- Design, develop and maintain websites using Java Spring Boot
- Developing the front-end mobile applications using the flutter framework.
- Make necessary Restful APIs for the mobile applications using Laravel.
- Test APIs using postman.
- Make changes requested by customers.

- Work closely with cross-functional teams to create innovative solutions that meets business needs.
- Observe client feedback thought meetings and recommend improvement to their websites.
- Work on required changes for SEO.

March 2021 – May 2021
Intern at Tecomsa

- Worked on myself in a self-learning process by learning the basics of the Laravel framework.
- Assisted the company with basic content integration in their projects.

July 2020 – September 2020
Intern at Enerkem

- Developing an ecommerce desktop application using java swing.
- Writing a documentation for the application above under the supervision of my supervisor.
