RAYAN MORTADA

DevOps Engineer | Penetration Tester | Cyber Security Specialist | Ethical Hacker Bekaa, Lebanon | +961 71 773 473 | Rayanmortada-11@outlook.com | Linkedin.com/in/rayan-mortada

EDUCATION

Lebanese International University (LIU) - Bekaa, Lebanon

Jul 2022 - Jan 2024

Bachelor's Degree in Computer Science

- Relevant Coursework: Database, Data Structure, Operating System (OS), Advanced Programming Using Java
- Cumulative GPA: 3.97/4.0

Lebanese Internal Security Forces (ISF) Institute - Beirut, Lebanon

Aug 2021 - Jul 2022

Diploma in Law Enforcement, Investigation, and Interviewing

Lebanese Military Academy – Beirut, Lebanon

Nov 2018 - Aug 2021

Bachelor's Degree in Military Sciences

PROFESSIONAL EXPERIENCE

Lebanese Internal Security Forces (ISF) – Zahle, Lebanon **First Lieutenant**

Aug 2021 – Present

- Directed units of 50+ members, urged them to coordinate, and ensured their preparedness for task implementation.
- Monitored service implementation within the group while overseeing subordinates to guarantee adherence to core functions.
- Executed superiors' orders, complied with laws and regulations, and addressed any errors which reduced legal disputes by 10%.
- Supervised the development of subordinates, instilled qualities, fostered sympathy, a sense of duty, responsibility, honesty, loyalty, and sacrifice for the homeland.
- Implemented 30+ law enforcement operations while demonstrating planning and execution throughout each mission.
- Enforced discipline while imposing sanctions and offering rewards, when necessary, which increased team morale by 25%.
- Managed buildings, equipment, and supplies, allocated unit resources, optimized resource allocation, and reduced wastage, resulting in a 10% cost-saving.

UNIVERSITY PROJECTS

Senior Project: Automated Vehicle Identification and Theft Detection System using AI

Dec 2023

Captured license plate numbers with a 90% accuracy using Arduino and sensors.

- Compared the numbers with a database of 1M+ rows in real time to check for any legal issues.
- Used a developed software with 300+ lines of code for officers to access and see vehicle details.
- Identified any legal issues associated with cars, contributing to a 20% reduction in complications.

LANGUAGES

Arabic: Native | English: Proficient | French: Proficient

SKILLS

Hard Skills: Predictive Modeling, Natural Language Processing, Machine Learning, Artificial Intelligence.

Programming & Scripting: PHP, PowerShell, Java, Python, C++, SQL.

Penetration Testing Tools: Nmap, Burp Suite, Metasploit, SQLmap, Wireshark. **OS and Network Administration:** Linux, Windows Server, VPN technologies.

Technical Skills: AWS (Amazon web services), Jenkins, CI/CD pipeline,

Terraform, Ansible, git, GitHub, Docker, Kubernetes.
