Farah Sherry

COMPUTER SCIENTIST

OBJECTIVE

Seeking a challenging position in the field of Computer Science where I can apply my strong problem-solving abilities, technical expertise, and passion for innovation to develop efficient solutions, contribute to cutting-edge projects, and support organizational objectives.

TECHNICAL SKILLS

1. **Programming Languages**: Proficient in Python, Java, C, C #, JavaScript, and SQL.
2. **Database Management**: Skilled in designing, implementing, and maintaining databases using MySQL,
3. **Data Structures and Algorithms**: Strong understanding of fundamental data structures (arrays, linked lists, trees, graphs) and algorithms (sorting, searching, dynamic programming).
4. **Machine Learning and AI**: Understanding of machine learning concepts and experience with frameworks like TensorFlow, and PyTorch.
5. **Web Development**: Proficient in HTML, CSS, and responsive design practices for creating user-friendly web interfaces. Developed a hospital management system using PHP.
6. **Software Development**: Experience with full-stack development, including working with .NET 7 and developing e-commerce websites.

SOFT SKILLS

1. **Growth mindset**: An ability to learn continuously and willingness to adapt to change.
2. **Creativity:** Developing new ideas, applying new solutions to address existing problems.
3. **Communication skills:** Interpreting information though speaking, listening and observing.
4. **Problem-Solving**: An ability to analyze issues, identify solutions, and implement effective resolutions.
5. **Innovation:** Improving upon an existing idea, concept, process or method to achieve a desired outcome.

COMMUNICATION SKILLS

1. Core team member, Computer Science Club at university.
2. Team member, Google Developer Student Club.
3. Volunteered at annual robot competition.
4. Private teacher for high school classes.
