PROJECTS AND ACHIEVEMENTS

- **Websites:**

•**Quiz Website:**   2024
Using React and Redux:
Allows users to select the category, difficulty, type, and number of questions for the quiz.
Displays a loading screen while the questions are being fetched.
Displays the questions one at a time, along with the options to choose from.
Keeps track of the user's score and displays it at the end of the quiz.
Allows users to go back to the settings page to start a new quiz.

• **School System:**   2024
Using JavaFX. Teachers and admins are allowed to see the grades and all the information's
about the students that can register in courses and choose their own constructor. Plus,
the note transcript is displayed.

• **Booking Website:**   2024
Using HTML, CSS, and JavaScript. It features sections for travel, home, car, hotel
booking, and user registration/login.

• **Medical Products:**   2023
Using HTML, CSS, JavaScript, jQuery, and database. Used for selling medical products.

• **Technology Reviews:**   2021
Using HTML, CSS, and JavaScript to stay up-to-date with the latest
advancements and trends in technology.

- **Programs:**

• **Renting Cars:**   2023
Using Java, I developed a program for Customers and Managers users. Customers
can rent and modify car rentals, while managers maintain the system.
