SOFTWARE DEVELOPER

Junior software developer seeking a full-time, engaging, and challenging role to apply my coding expertise, collaborate with a dynamic team, and contribute to the development of cutting-edge software solutions.

RELEVANT PROJECTS

Chat App- FullStack Development (In Development)

- Developed a ChatApp with React for a responsive design.
- Implemented an API to validate and check text before sending.
- Enabled real-time messaging, allowing users to interact seamlessly within the app.
- Ensured secure communication.
- Source code: https://github.com/BaqerAttwi/chatapp

Social Media - FullStack Development

- Created a responsive platform with React for posting images, liking, and commenting.
- Used a third-party API to verify user nationality, validating images and comments before submission.
- Built a Node.js backend to handle API requests and interactions.
- Stored user data, posts, and interactions securely in MySQL.
- Source code: https://github.com/BaqerAttwi/SocialMedia

Food Store- FullStack Development

- Created an admin panel using HTML, CSS, JavaScript, and PHP for managing items and viewing feedback.
- Implemented login functionality to allow users to add and submit feedback.
- Designed a responsive interface to ensure usability across various devices.
- Utilized MySQL for secure storage and management of user data and feedback.
- Source code: https://github.com/BaqerAttwi/Food-store

RELEVANT SKILLS

Frontend Development	Backend Development	Database	Programming languages
- React	- Node.js	- MySql	- Java
- Flutter	- Php	- PhpMyAdmin	- C
- Html/CSS	- ExpressJs	- MongoDB	- C#

- Proficient in building dynamic, responsive, and user-centric web applications using React, focusing on reusable components and state management for seamless user experiences
- Experienced in developing scalable and performant server-side applications with Node.js and Express, leveraging asynchronous programming and RESTful APIs to deliver robust backend solutions.
- Skilled in building dynamic web applications with PHP, focusing on server-side scripting, database integration, and maintaining code efficiency to enhance application performance.

CORE COMPETENCIES

Data Structures & Algorithms(JAVA)
Proficient in fundamental data structures and algorithms for efficient problem-solving.

Operating Systems(C&Java) & AI:
Familiar with core concepts of operating systems and artificial intelligence.

Object-Oriented Programming: (Java)
Experienced in designing and implementing object-oriented solutions for software development.

EDUCATION
Computer Science-LIU (Beirut)

September 2021 – June 2024

VOLUNTEERING
Red Cross

May 2023 – Current
