

Recent Computer Science graduate with a solid foundation in cybersecurity and DevOps. Eager to contribute and grow in a dynamic environment, leveraging hands-on experience in Linux, Bash scripting, CI/CD pipelines, Docker, and AWS, acquired through internships and specialized training. Looking forward to collaborating with experienced professionals and expanding technical expertise.

## EDUCATION

### Notre Dame University - Lebanon

Bachelor of Computer Science  
2019 - 2023

## THECNICAL SKILLS

- JavaScript
- ReactJS
- CSS / HTML
- Linux / Kali Linux
- Denodo
- Tableau
- Basics of C++/Python/C#
- GitHub

## SOFT SKILLS

- Communication/Teamwork
- Flexibility
- Problem Solving
- Conflict Resolution
- Critical Thinking
- Adaptability

## LANGUAGES

- Arabic  
Native or Bilingual Proficiency
- English  
Full Professional Proficiency
- French  
Full Professional Proficiency

## CERTIFICATES

- Coursera Meta Front-End Developer Professional Certificate (12/2023 - Present)
- Denodo Platform 8.0 Developer Associate Certificate (07/2023 - 08/2023)

## WORK EXPERIENCE

### Eurisko Mobility

5/2024 - 7/2024

DevOps/Cyber Security Academy

- Proficient in Linux commands, file system management, networking, and security, with experience using Kali Linux in virtual environments.
- Skilled in Bash scripting for automation and streamlining tasks.
- Strong understanding of cybersecurity fundamentals, including networking, OSI model, DNS, VPNs, cryptography, and common cyber threats.
- Knowledgeable in DevOps and DevSecOps principles, including CI/CD pipelines, Docker containerization, and AWS cloud services.
- Experienced in integrating security into DevOps workflows, focusing on pre-commit hooks, vulnerability management, and cloud-native security best practices.

### DataMind-Me

6/2023 - 8/2023

Product Consultancy Intern

- Proficient in Tableau for transforming and analyzing data through charts, maps, and other visualizations.
- Worked on real-world datasets using Tableau for data-driven insights.
- Skilled in using Denodo for optimizing big data performance, logical data warehouses, and operational scenarios.
- Earned the Denodo Developer Certificate for expertise in data virtualization.
- Knowledgeable in Cloudera for cloud-native analytics, including data engineering, warehousing, streaming, and machine learning.

### Grind Digital

1/2023 - 3/2023

Game Developer Intern (VR)

- Proficient in game development using Unity and C#.
- Gained experience in XR through various projects and assignments.
- Developed a VR bowling game, focusing on object physics.
- Created an AR face filter and a plane surface scanner for mobile devices.
- Built a 3D game involving obstacle dodging mechanics.
