Skills

Python Programming | HTML | Javascript (JS) | SIEM TOOLS | SQL | Linux | IDS | Networking | Firewalls | OSI Model | Reporting | Documenting | Communication | Problem-Solving | MS Office | Burp Suite | NMAP | Metasploit

Experience

Concorde Development / Pentester
AUGUST 2024 - Present, Lebanon

- Perform solo penetration tests on web applications and network infrastructure, identifying and documenting vulnerabilities to enhance client security.
- Run vulnerability scans and manual tests, tailoring the approach to client needs and uncovering key security issues for immediate remediation.
- Leverage tools like Burp Suite, Nmap, and Metasploit to perform comprehensive assessments, gaining practical experience in identifying and exploiting vulnerabilities.
- Prepare detailed reports for the client, translating technical findings into clear, actionable recommendations supporting security improvements.

BillyBoyz HeadQuarter / IT Support
DECEMBER 2023 - JULY 2024, Serail, Lebanon

- Performed regular penetration testing to identify vulnerabilities, providing actionable insights to strengthen network and application security.
- Supported red team activities by evaluating network defenses and helping uncover security gaps to enhance threat detection and response capabilities.
- Regularly updated security protocols and conducted system audits, contributing to the organization's proactive cybersecurity posture.

Education

TryHackMe / Pre-Security Certification

OCTOBER 28, 2024, Online Certification
