EDUCATION

2024: Bachelor's degree in Computer Science – Lebanese University.

2020: Lebanese Baccalaureate in General Science – St. Joseph des filles de la Charité.

PROJECTS

Lebanese Rugby Lead Federation Android Application(2024):
- Developed an Android application using Java in Android Studio, connected to a MySQL database via a Node.js backend with Express.js.
- Enabled users to view match schedules, with additional functionality for coaches and admins to manage matches, clubs, teams, and players.
- Streamlined data management for the federation, enhancing coordination and efficiency.

Shelter Application and Website(2023):
- Developed an Android application using SQLite and a React website with Firebase for a shelter.
- Enabled users on both platforms to browse dogs and cats available for adoption.
- Integrated functionality for making donations to support the shelter through the app and website.
- Enhanced the shelter's outreach and simplified the adoption process.

Front-End Photography Website(2022):
- Designed and developed a responsive front-end website from scratch using HTML, CSS, and JavaScript.
- Created a visually appealing platform for a photography business to showcase their portfolio and services.
- Enabled visitors to browse the photographer's past work in an engaging way.
