SUMMARY

Graduated from the Lebanese University with a very good academic performance. I have a strong foundation in programming, Adept at fostering collaborative environments, ensuring clear communication, and solving complex problems . Seeking an opportunity to leverage technical proficiency to contribute to a forward-thinking organization.

PROJECTS

APPLE WEBSITE
- Build a responsive apple website in a team of 4. Using html,css,javascript and php.
- The design was crafted using JavaScript and CSS to ensure a responsive and user-friendly interface and PHP for back-end functionality.
- The website we delivered is both user-friendly and visually appealing, perfectly aligning with Apple's brand standards.

KRA DRIVING SYSTEM
- Build KRA System in a team of 2 , KRA System is a driving-aid system,
- Available to the driver when the vehicle is moving forward
- Allows the vehicle to follow the flow of traffic while on a limited access highway.
- The driver interacts with the KRA through the Adaptive Cruise Control buttons.

LU MANAGEMENT SYSTEM DEVELOPMENT
- Build a responsive University web application Management system (Lebanese university) using HTML,CSS, JavaScript and PHP.
- PHP is utilized for server-side scripting to handle dynamic content generation and interaction with the SQL database.
- SQL is employed for database management, ensuring secure and efficient data storage and retrieval.
