Education

Lebanese American University, Lebanon

Jan. 2023 – Dec. 2025

– Bachelor of Science in Computer Science

Experience

CodeAlpha Internship | *Java Development*

Summer 2024

- Worked on a Word Counter as an introductory task to get familiar with Swing and GUI development in Java.
- Developed a Hotel Review System using Java Swing and MySQL, implementing features for adding, viewing, and rating hotels.
- Built a complete Travel Booking System where users can book flights, hotels, and transportation, handling both user and admin functionalities.

Projects

Travel Booking System | *Java, Swing, MySQL*

Summer 2024

- Developed a complete travel booking system where users can book flights, hotels, and transportation, all linked to the same destination.
- Created a user-friendly graphical interface using Java Swing, handling both the admin and user functionalities.
- Integrated MySQL for managing user bookings, hotel information, and admin operations.

Hotel Review System | *Java, Swing, MySQL*

Summer 2024

- Developed a hotel review system where users can add, view, and rate hotels.
- Implemented a user authentication system using MySQL to store user credentials and hotel information.
- Created a GUI using Java Swing for users to interact with the application, including features to view a list of hotels, add new hotels, and rate them.

Social Media Database | *Java, Swing, MySQL*

Spring 2024

- Designed a sample social media database management system using SQL to simulate the common functions of having and monitoring a social media platform.
- Used Java Swing to create a GUI that supports actions such as getting user information, adding and deleting users, etc.

Technical Skills

Languages: Java, Python, C, MySQL

Developer Tools: VS Code, Eclipse

Technologies/Frameworks: Linux
